

CAPSULE SUMMARY SHEET

Survey No.: CH-232 (PACS C6) Construction Date: circa 1890

Name: Page Schoolhouse Property

Location: 9000 Block of Crescent Lane, La Plata vicinity, Charles County

Private/Vacant/Unoccupied/Good/Not accessible

Description:

The Page Schoolhouse Property is a 1-story, 1-room schoolhouse on the south side of Crescent Lane near the junction of Turkey Hill Road. Constructed circa 1890, the schoolhouse has an enclosed entry. The structure has a standing seam metal, front-gable roof with two interior brick chimneys near the north and south walls. The schoolhouse is of wood-frame construction with wood clapboard siding, and it has a foundation of brick piers. The enclosed entry has a front-gable roof and a five-panel wood door with a transom. The windows are 6/6 double-hung wood, all of which have operational wood shutters. There are two windows on both the north and south elevations, and one window on the west elevation.

Significance:

The Page Schoolhouse is an excellent example of a late 19th century one-room schoolhouse still located on its original site. According to the present owner of the property, Philip Spalding, the schoolhouse was in continuous use until circa 1930. The Page Schoolhouse Property is a rare example of a one-room schoolhouse in Charles County and represents a significant part of the history of education in the county. The Page Schoolhouse Property was originally situated on 0.40 hectares (1 acre) of land sold by Horatio Claggett Page and Mary B. Page to the Board of School Commissioners of Charles County in 1885 "for the purpose of erecting a schoolhouse for the education of white children" (DB BGS8- 598). A schoolhouse was built on the land circa 1890. The 0.40 hectare (1 acre) lot was part of the Pages' "Oak Grove," holdings estimated at approximately 172.40 hectares (426 acres) at the time of Mary

B. Page's death in 1887 (DB 24-219). The small, frame schoolhouses of the nineteenth century fell into disuse after the tornado of 1926 in which thirteen children were killed in a two-room schoolhouse in La Plata. A building committee was organized in 1927 and the consolidated school, constructed of brick, was opened in La Plata during 1928 (Willet 1988:32-33). The Board of School Commissioners of Charles County sold the Page Schoolhouse and the .40 hectare (1 acre) lot associated with it to Walter Page in 1930. The lot became part of the 90.24 hectares (223 acres) sold by the Pages to the present owners, Philip and James Spalding, in 1942. The Page Schoolhouse Property is currently located on a 2.06 hectare (5 acre) parcel.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Page Schoolhouse Property is a 1-story, 1-room schoolhouse on the south side of Crescent Lane near the junction of Turkey Hill Road. Constructed circa 1890, the schoolhouse has an enclosed entry.

The structure has a standing seam metal, front-gable roof with two interior brick chimneys near the north and south walls. The schoolhouse is of wood-frame construction with wood clapboard, and it has a foundation of brick piers. The enclosed entry has a front-gable roof and a five-panel wood door with a transom. The windows are 6/6 double-hung wood, all of which have operational wood shutters. There are two windows on both the north and south elevations, and one window on the west elevation.

The property is located on its original site on the south side of Crescent Lane west of the junction of Turkey Hill Road. There is modern residential development to the west and south of the schoolhouse. The site is generally level, and there is a growth of old woods to the south, and the trace of an abandoned road to the east. The property's setting is a rural area which has a mixture of mid twentieth century and recently constructed residences.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Page Schoolhouse Property was originally situated on 0.40 hectares (1 acre) of land sold by Horatio Claggett Page and Mary B. Page to the Board of School Commissioners of Charles County in 1885 "for the purpose of erecting a schoolhouse for the education of white children" (DB BGS8-598). A schoolhouse was built on the land circa 1890. The 0.40 hectare (1 acre) lot was part of the Pages' "Oak Grove," holdings estimated at approximately 172.40 hectares (426 acres) at the time of Mary B. Page's death in 1887 (DB 24-219). The small, frame schoolhouses of the nineteenth century fell into disuse after the tornado of 1926 in which thirteen children were killed in a two-room schoolhouse in La Plata. A building committee was organized in 1927 and the consolidated school, constructed of brick, was opened in La Plata during 1928 (Willet 1988:32-33). The Board of School Commissioners of Charles County sold the Page Schoolhouse and the .40 hectare (1 acre) lot associated with it to Walter Page in 1930. The lot became part of the 90.24 hectares (223 acres) sold by the Pages to the present owners, Philip and James Spalding, in 1942. The Page Schoolhouse Property is currently located on a 2.06 hectare (5 acre) parcel. There are no detailed, published historic maps or atlas of Charles County, Maryland which locate and indicate ownership of buildings.

From the beginning of the eighteenth century to the middle of the twentieth century, schools in rural America were invariably one-room schools. If population increased in a rural area, however, two one-room buildings could be joined together to form a larger building and then separated if the population began to decline. The level of funding provided by an area had a great impact on the kind of school that its residents constructed.

The most recognizable form of rural school building is a front-gable structure with a three-bay facade and three windows symmetrically arranged along each side. Such schools commonly had a bell tower located close to the front of the building and a chimney placed at the back of the roof. Most schools also had either a partial shed roof porch supported by wooden posts, or an enclosed entry porch. In most school buildings, the depth exceeded the width. In poorer areas schools were simple structures, often with a side gable roof, constructed of timber with board and batten siding. These schools usually had only one window in the front and one on each side. They also included an exterior gable end chimney usually made of stone. Many schools in very remote areas were frequently constructed of logs.

8. Significance (Continued)

Beginning in the 1870s, a growing number of architects became interested in designing rural schoolhouses. Numerous articles appeared in journals of the period which outlined these designs. Commonly, they stressed Gothic Revival features and Queen Anne gingerbread woodworking. Such designs reflect the growing idealization of rural life seen in much of the literature during this period. After 1900, some rural schools were built with either bungalow-style or four-square style hipped roofs thus reflecting the influence of contemporary urban building styles. By this time, however, the heyday of the one-room schoolhouse was over. The first two decades of the twentieth century saw large-scale school district consolidations all across the country brought on by the advent of improved roads and school buses. Today, fewer than one percent of one-room schools are still in use in the country (Gulliford 1991, 35-45).

The Page Schoolhouse is located in Charles County, in southern Maryland. The Native American inhabitants of southern Maryland from the Piscataway and Potobac nations were joined by European settlers beginning in 1634 with the establishment of St. Mary's City by Leonard Calvert. Successive waves of colonists took up tracts of land further inland from the Chesapeake Bay along the Patuxent and Potomac rivers and their tributaries. Charles County was formed in 1658 and Prince George's County was established in 1696. Settlement was confined to inland areas until road clearing began in the mid-eighteenth century as a result of the establishment of port towns and Maryland's rising population. Tobacco cultivation dominated the economic and social life of both Charles and Prince George's counties until the mid-nineteenth century when soil exhaustion necessitated agricultural diversification. The introduction of rail lines in 1873 linked Prince George's and Charles counties with the surrounding area, encouraging trade and settlement. While the suburbanization of Prince George's and Charles counties was ensured by the widespread availability of the automobile in the mid-twentieth century, these southern Maryland counties have also retained their rural and agricultural character.

8. Significance (Continued)

NATIONAL REGISTER EVALUATION:

The Page Schoolhouse Property, constructed circa 1890, is eligible for the National Register under Criterion A, as an excellent example of a late 19th century one-room schoolhouse still located on its original site. According the present owner of the property, Philip Spalding, the schoolhouse was in continuous use until circa 1930. The Page Schoolhouse Property is a rare example of a one-room schoolhouse in Charles County and represents a significant part of the history of education in the county. In addition, the property is eligible under Criterion C, as an intact example of a one-room schoolhouse. The structure has not been altered and it retains its original wall materials, windows, shutters, and doors. Despite recent residential development in the neighborhood, the schoolhouse is screened from the development by woods, and its historic setting, including the trace of the original roadbed to Turkey Hill Road, remains intact. Historic research indicates that the property has no association with persons who have made specific contributions to history, and therefore, it does not meet Criterion B. Finally, the structure has no known potential to yield important information, and therefore, is not eligible under Criterion D.

10. Geographical Data (Continued)

Verbal boundary description and justification:

The National Register boundaries of the Page Schoolhouse Property follow the current property lines of the part of the Spalding Property (Charles County Tax Map 23, Parcel 20) located on the south side of Crescent Lane. The boundaries exclude that part of the 2.06 hectare (5.08 acre) parcel located on the north side of Crescent Lane. The parcel is divided into two parts by Crescent Lane and is bounded on the north, south, west and east by adjacent tax parcels. The boundary includes the schoolhouse and the land, approximately 0.4 hectares (1 acre), historically associated with the school. According to deed research, the parcel was sold by Horatio Claggett Page and Mary B. Page to the Board of School Commissioners of Charles County in 1885.
